A MAXITOO GROUP COMPANY

Certainty in Safety – Certainty in Quality – Certainty in Value

MAXITOOL MINING THE SMART SOLUTION

Introduction

Maxitool was founded in 2007 by a number of key personnel who have extensive experience in providing services to the resources sector, particularly construction, maintenance, project and shutdown management of processing plants. We pride ourselves on being a diverse maintenance and repair specialist providing first-class services internationally and throughout Australia and have an uncompromising commitment to excellence in every area of operation which underpins how we do business and continues to help us grow into a respected service provider.

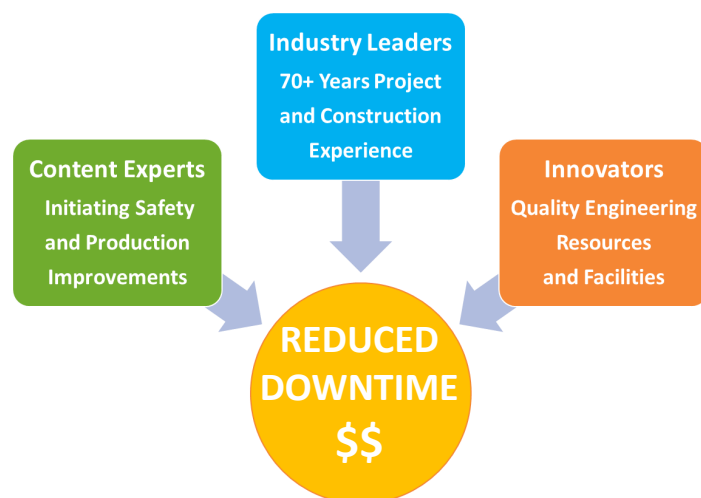

Safety Culture

The safety and well-being of all personnel associated with Maxitool forms the most important of the 3 pillars of our Mission and is critical to our business.

“Safe Work” is a culture promoted by all at Maxitool and is supported by robust systems and processes that have been tailored to the type of work we do. This approach has enabled us to achieve an excellent safety record in what can be considered a high risk environment.

Continuous Improvement

Maxitool embraces a “continuous improvement culture” based on Kaizen ideals, supported by a structured system and process to relentlessly pursue improvement in productivity and operational excellence in order to continue to be successful and remain competitive. We at Maxitool share these ideals and look forward to partnering with like-minded clients.

Content Experts

Maxitool Mining specialise in identifying, designing, fabricating and installing modifications/additions that improve safety and increase production. We understand the complexities of production environments, along with the demands of isolated sites and difficulties with extreme weather conditions.

Industry Leaders

With 70+ years of combined experience, along with our extensive pool of long-term qualified and experienced personnel encompassing all skill classifications (domiciled throughout the Australasian region), we are leaders in providing construction and project specialist solutions for all types of new or existing mineral processing plants.

Innovators

We proactively develop plant modifications to increase safety, production and efficiency. We also uniquely offer complete design, engineering, fabrication and installation services. Maxitool Engineering supply specialist tooling and equipment which is manufactured and certified to a high standard.

MAXITool MINING PROJECT SOLUTIONS

Specialist Project Services

We specialise in the delivery of site-based processing plant maintenance, repairs and turn-key projects (with a focus on plant outages) including:

Mills
Conveyors
Commissioning
Screening

Feeders
Transfer Chutes
Decommissioning

Crushers
Installations
Labour - Trades/Technicians/
Technical Professionals

★ GREENFIELD

★ BROWNFIELD

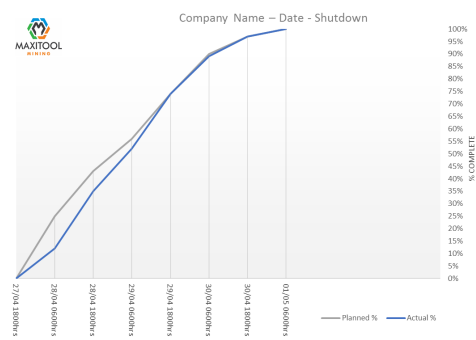

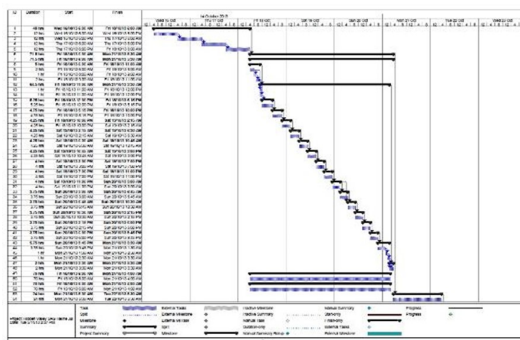

★ MODIFICATIONS

Team Work

Successful outcomes are the result of collective effort. Whether it be operational issues, conflicting work or required design changes, we endeavour to work with all stakeholders, including the plant owner and other maintenance providers to deliver an optimal outcome.

Planning and Reporting

Once the scope of work has been finalised for a project, we generate a detailed plan (Gantt chart). Effective project tracking is critical to the execution of shutdown plans. Our proven systems and processes enable us to track progress in detail, offer live reporting and produce reports throughout each critical stage, which sets us apart from our competitors.

MAXITool MINING CONSTRUCTION SOLUTIONS

Specialist Construction Services

We tailor our construction services to suit our clients needs including managed works packages, installation only or full construction management including the supervision and management of sub-contractors based on a vertical package of works. Our specific installation/commissioning capabilities include:

Structural Steel Erection
Crushers

Conveyor Galleries
Mills

Pipes
Thickeners and Tanks

Equipment Manufacture and Engineering Services

Maxitool Engineering specialise in the design and manufacture of specialist tools and equipment.

Specific capabilities include:

Mill Reline Machines
Liner Bolt Torqueing
Project Engineering

Specialty Lifting Equipment
Hydraulic Design
Design Compliance

Material Handling
Engineering Design (3D & FEA)
Structural Steelwork

People

We can assist with resource industry personnel in the following classifications:

Technical Trades
Engineers
Outage and Maintenance Planners

Project Managers
Commissioning Engineers and Technicians
Process Plant Operators

All candidates for placement undergo a detailed vetting process to ensure they are compliant and fit for work. This includes thorough reference checking, medical assessment and screening.
